

## Enabling WordPress Registration

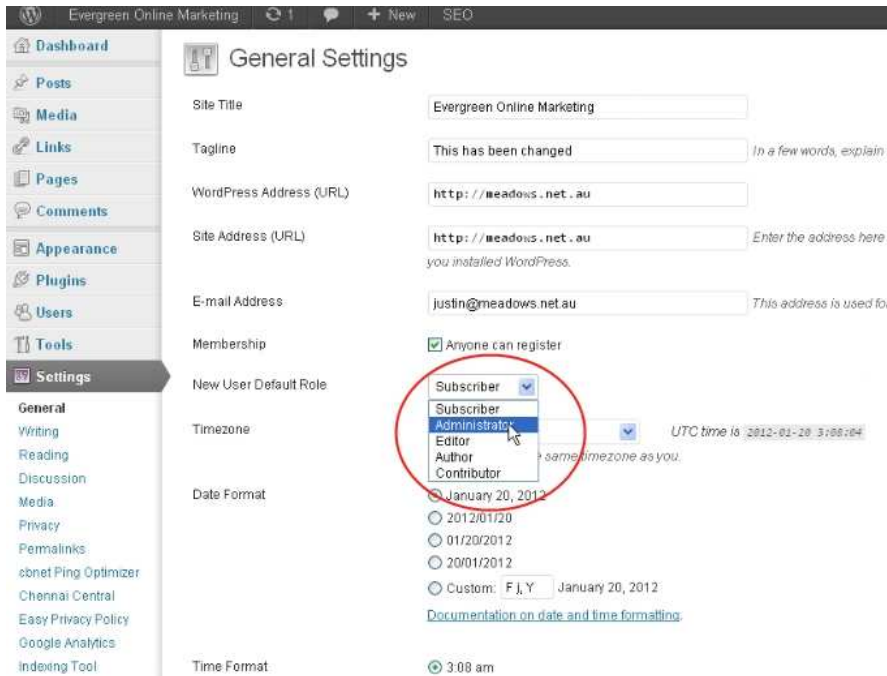

To enable user registration, navigate to **SETTINGS** and then **GENERAL**.

The **General Settings** page will be presented with different options.

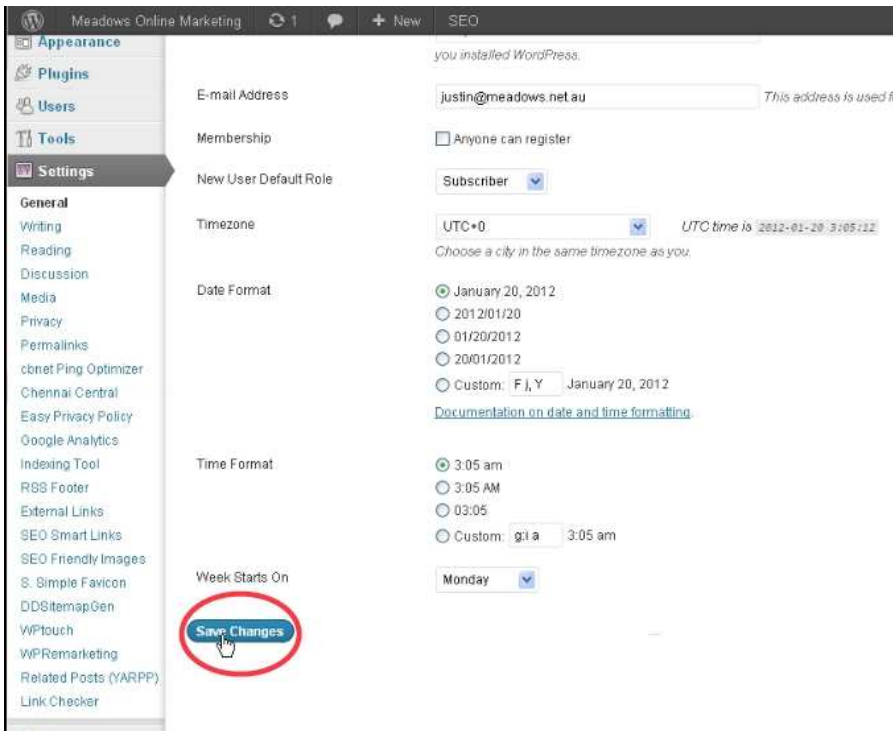

Click the box for **Anyone Can Register** to enable user registration.

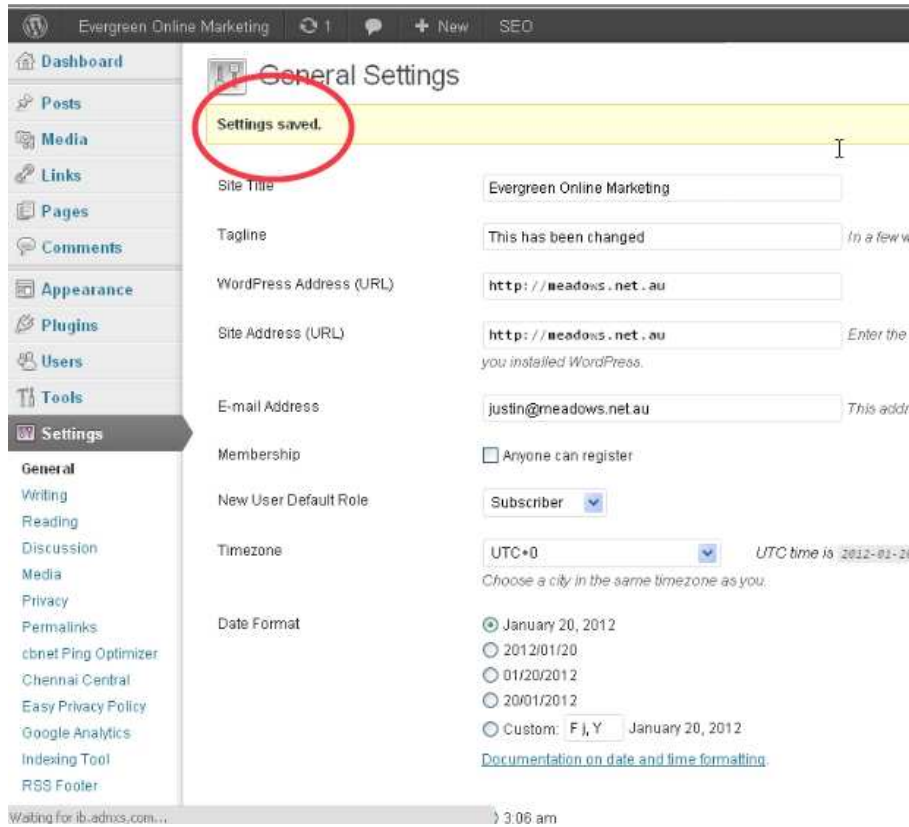

After enabling registration, select the **New User Default Rule**.

You can assigned a user as:

- Subscriber
- Administrator
- Editor
- Author
- Contributor

Click on the **SAVE CHANGES** when you have completed the changes.

A screenshot of the WordPress administration interface. The top navigation bar shows 'Evergreen Online Marketing' and 'SEO'. The left sidebar contains menu items: Dashboard, Posts, Media, Links, Pages, Comments, Appearance, Plugins, Users, Tools, and Settings. The 'Settings' menu is expanded, showing sub-items: General, Writing, Reading, Discussion, Media, Privacy, Permalinks, cbnat Ping Optimizer, Chennai Central, Easy Privacy Policy, Google Analytics, Indexing Tool, and RSS Footer. The main content area is titled 'General Settings'. A yellow notification banner at the top of the settings area says 'Settings saved.' and is circled in red. Below the banner are several settings fields: Site Title (Evergreen Online Marketing), Tagline (This has been changed), WordPress Address (URL) (http://meadows.net.au), Site Address (URL) (http://meadows.net.au), E-mail Address (justin@meadows.net.au), Membership (checkbox for 'Anyone can register'), New User Default Role (Subscriber), Timezone (UTC+0), and Date Format (January 20, 2012). The bottom of the page shows a status bar with 'Waiting for lb.adnxs.com...' and '3:06 am'.

WordPress will make an alert on the upper portion of the page on the status of the settings made.
